Scheduled Speakers

- Dr. Peter Brindley is a full-time Critical Care Doc at the University of Alberta Hospital; Professor of Critical Care Medicine, Anesthesiology, and Medical Ethics. He has over 100 peer-reviewed manuscripts, 25 book chapters, 50 lesser manuscripts, one book published and one pending. He's delivered over 400 invited presentations in 12 countries, and over 50 plenaries. He is a founding member of the Canadian Resuscitation Institute and helps organize several national and international conferences and has advised a brace of Medical Royal Colleges.
- Michael S. Broyles, BSP Pharm, RPh, PharmD is a clinical pharmacist providing progressive pharmaceutical care and consulting for hospitals and healthcare industry providers. He has 34 years experience in pharmacy management, teaching, clinical program implementation, software development, and consulting for some of the nation's largest infectious disease, medical software, and IDN groups. High priority on appropriate antibiotic use and antimicrobial stewardship, including the use of Procalcitonin testing.
- Dr. R. Phillip Dellinger is Professor of Medicine and Distinguished Scholar at Cooper Medical School of Rowan University (CMSRU). He is Senior Critical Care Attending and Director Cooper Research Institute, Cooper University Health (CUH). His primary academic interests are new innovative sepsis therapies, sepsis management and sepsis performance improvement. He co-edited the second, third and fourth (2014) edition of Critical Care Medicine (Mosby) and co-edits the fifth edition to be published in early 2019. He is associate editor of Critical Care Medicine journal. He is past chairman of the International Sepsis Forum (ISF) and currently serves on the ISF Council. He was the lead author of the 2004, 2008 and 2012 Surviving Sepsis Campaign International Guidelines on the Management of Severe Sepsis and Septic Shock and senior author on the 2016 guidelines.
- Dr. Michael Hooper is a Pulmonary and Critical Care Medicine physician practicing at Eastern Virginia Medical School in Norfolk, VA. Dr Hooper trained at Vanderbilt University Medical Center, has a masters in Clinical Investigation, and is board certified in Clinical Informatics. His primary research interests include methods for early detection of sepsis and metabolic resuscitation. He worked alongside Dr. Paul Marik to develop the Vit C treatment they believe will revolutionize sepsis care worldwide.
- Christa A Schorr, RN, MSN, FCCM, is a Clinical Nurse Scientist at Cooper University Hospital and an Associate Professor of Medicine at Cooper Medical School at Rowan University. During her 25 years in nursing, she has practiced at the bedside, directed critical care quality improvement and clinical research and was the program manager for a North American sepsis clinical trial. She has lectured nationally and internationally on sepsis and performance improvement and authored or co-authored over 150 peer reviewed articles, book chapters and abstracts. Christa is a member of the SCCM's Thrive Task Force Committee, the SSC Executive Committee, and is the current SSC Guidelines Committee Group Head for long term outcomes and goals of care. Ms. Schorr continues to stress the importance of early sepsis identification, development of sepsis care processes and the significance of patient and family engagement.

The Sepsis Committee at Santa Clara Valley Medical Center Presents

Stop Sepsis. Start Now.

Monday

9 / 10 / 18

7:30am - 5:00pm

Administration Office #7C034 or RSC suite 320

Objectives

Upon completion of this course, the participant will be able to:

Develop an understanding of the science behind the recent studies and the international sepsis guidelines in the adult population

Discuss the need for early sepsis recognition and innovative approaches to recognizing patients

Understand why communication and teamwork may be the most dangerous "procedures" in acute medicine
