

Unedited list of diagnoses seen over 4 weeks on a single medicine wards team in 2018

| | |
|--|---|
| Abdominal wall cellulitis and abscess in man with underlying colon cancer | Achalasia presenting as respiratory failure from aspiration |
| Acute delirium induced by UTI in elderly woman | Acute hypoxic respiratory failure due to COPD exacerbation |
| Acute interstitial nephritis and LBP due to radiculopathy | Alcohol withdrawal and hypothyroidism |
| Angina due to severe AS with underlying rheumatic heart disease | Ascites due to alcohol related cirrhosis requiring 17 liter drainage |
| Aspiration PNA in Duchenne muscular dystrophy | Asthma exacerbation |
| Asthma exacerbation in patient with Down syndrome | AV fistula thrombosis in patient with ESRD |
| B12 deficiency from pernicious anemia presenting as microangiopathic hemolytic anemia | Bronchiolitis presenting as severe bronchospasm and leukocytosis |
| Calcified cardiac mass | Choledocolithiasis and new onset DM |
| Cognitive changes due to old TBI | Complete heart block presenting with syncope |
| Decompensated alcohol related cirrhosis | Diabetic foot ulcer with osteomyelitis |
| DKA | Eczema flare after abrupt steroid withdrawal presenting with SIRS |
| Emphysematous cystitis in a diabetic man complicated with atrial flutter with RVR | Esophageal cancer with metastases and PNA |
| GIB in patient with mechanical valve | Hemorrhagic CVA requiring craniotomy |
| HFrEF with 20 kg diuresis | Hospice planning in patient with AML |
| Hyperosmolar state due to hyperglycemia | Hypertensive emergency in homeless patient off medications |
| Hypertensive emergency with subendocardial ischemia | Hypertensive urgency |
| Hypoglycemia in elderly patient due to medications | Inadequate pain control after MVA complicated by medication withdrawal |
| Incomplete cord injury presenting with flank pain and GPC bacteremia | Infected baclofen pump requiring removal |
| Latent autoimmune diabetes in an adult | Left main coronary artery spasm |
| Metastatic breast cancer complicated by hypercalcemia and acute liver failure | Migraine with aura |
| Multiple myeloma with pain from bony lesions and cord compression | New onset HFrEF with multiple etiologies |
| Orthostatic hypotension causing syncope | Osteomyelitis of foot with underlying diabetic neuropathy and arthropathy |
| Pancreatic pseudocyst presenting with pain and malabsorption | Parapharyngeal abscess |
| PNA in patient with chronic vent | Post-influenza strep pneumonia |
| Presyncope in patient with EF 20% | Primary syphilis in patient with schizophrenia |
| Probable malingering in patient with HIV, homelessness | Pulmonary edema in ESRD in patient with lewy body dementia |
| Pulmonary edema in ESRD in patient without capacity | Reactive arthritis |
| Recrudescence of old spinal injury presenting as acute weakness | Recurrent GBM with hemiparesis |
| Refractory seizures in patient with epilepsy | SBP and skin abscess with underlying cirrhosis and methamphetamine use |
| SBP with bacteremia in woman with alcohol related cirrhosis | Seizure disorder in man with underlying schizoaffective disorder |
| Severe blood loss anemia from presumed GI source in patient with schizophrenia | Stage 3 adenosquamous carcinoma of the lung |
| Stage IV sacral pressure ulcer with osteomyelitis in patient with endocarditis associated septic strokes | Stroke due to intracranial stenosis |
| Subclavian artery stenosis with steal syndrome | Subendocardial ischemia due to viral URI in vent dependant patient |
| Syncope and AKI in alcohol use disorder | Toxic megacolon from c. diff |
| UGIB in patient with cirrhosis and esophageal varices | UTI in patient with underlying severe anoxic brain injury |
| Vtach arrest in patient with ESRD | Widely metatic lung adenocarcinoma |
