

**Unedited list of diagnoses seen over 4 weeks on a single Medicine Wards team**

Acute CHF due to methamphetamine use	Acute delirium in elderly man due to narcotics
Acute delirium with probable underlying dementia	Acute on chronic diastolic CHF
Acute symptomatic hyponatremia due to chemotherapy	Adenocarcinoma presenting as new pleural effusion
AIDS and Castleman's admitted with neutropenic fever	AIDS patient admitted with ARDS of unclear cause
Alcoholic hepatitis	Alcoholic hepatitis and upper GIB
Antiphospholipid antibody syndrome also diagnosed with PJP pneumonia and T cell lymphoma	Pulmonary Aspergillosis
Atypical chest pain	Atypical meningioma presenting as ataxia and personality changes
Autonomic dysfunction in quadriplegic man due to nephrolithiasis	Bells' palsy complicated by CN III palsy and severe headache
Benzodiazepine overdose	Calf hematoma on Coumadin, rule out compartment syndrome
Cannabinoid hyperemesis syndrome	Cauda equina syndrome from recurrent lymphoma
Cellulitis that failed oral therapy	CHF exacerbation in context of cardiomyopathy and OSA
Chronic headache with VP shunt for cryptococcal meningitis in an immunocompetent man	Chronic mesenteric ischemia in context of methamphetamine use, ESRD and dilated cardiomyopathy
Concussive syndrome, rule out TIA	COPD exacerbation leading to intubation
Crohn flare	CVA
Decompensated cirrhosis from Hepatitis C and alcohol	Diverticulitis
DKA x 2	DVT and probable PE in context of diastolic dysfunction and OSA
Emphysematous pyelonephritis	Follicular lymphoma with sepsis from parapneumonic effusion
Food impaction from candidal esophagitis in an immunocompetent woman	Gangrene of foot
Gastroparesis in chronically ventilated patient	GI bleed from portal hypertensive gastropathy
GIB in man with polycythemia vera	Health care associated pneumonia in bipolar patient
Healthcare associated pneumonia in vented patient	Hepatic encephalopathy
Hepatorenal syndrome	Hyperkalemia
Hyperosmolar hyperglycemic state	Hypertensive urgency with hyponatremia
Ischemic CN III palsy	Ischemic foot
Klatksin tumor presenting as painless jaundice	Klebsiella sepsis from SBP complicated by hepatorenal syndrome
Metastatic breast cancer with pancytopenia, fever and epistaxis	Malingering vs TIA
Myelodysplastic syndrome presenting as severe sepsis from abscess	MSRA endocarditis in cirrhosis who then developed hepatorenal syndrome
Neutropenic enterocolitis in patient with AML	Nephrolithiasis and pyelonephritis in pregnant woman
Obstructing colon cancer presenting as anemia in woman with schizophrenia	Obesity hypoventilation syndrome
Otitis media in the context of immunosuppression from multiple myeloma	Osteomyelitis of the foot
Peritonitis in patient on CAPD	Pain flare in rheumatoid arthritis and fibromyalgia
Polymicrobial abscess and cellulitis due to IVDU	Photosensitive dermatitis due to medication
Recurrent aspiration	Pulmonary hypertension with worsening dyspnea
Recurrent seizures	Recurrent cellulitis and sepsis in patient with metastatic urothelial carcinoma
Rule out MI in context of IBS	Rhabdomyolysis from taser injury
SBO in patient with SLE and antiphospholipid antibody syndrome	SBO
Seizure in patient with previously resected meningioma	Subdural hematoma due to trauma
Severe sepsis from hydronephrosis from recurrent transitional cell carcinoma	Serotonin syndrome
Staph aureus endocarditis presenting as sepsis and acute GN in patient with underlying cirrhosis	Severe sepsis from UTI in context of paraplegia
Strep viridans endocarditis on a bicuspid aortic valve	Status asthmaticus
Syncope caused by hypoglycemia	Syncope
Syncope with question of underlying seizures	Syncope due to mitral stenosis
Uterine sarcoma with hydronephrosis and bony mets
